The Ultimate PMP Prep Boot Camp Course

IPDI offers a wide range of project management and general management on-site courses to improve your company's effectiveness and efficiency

Over the past nine months, IPDI has been reviewing the newly released Project Management Body of Knowledge (PMBOK) Guide 4th Edition to understand the improvements and changes to the standard and how it will impact the PMP exam.

We have benchmarked other PMP prep courses to learn their strengths and weaknesses.

We have also spent this time developing the Ultimate PMP Prep Boot Camp course.

Here are some characteristics of our new Ultimate PMP Prep Boot Camp course:

- Our updated course contains almost twice the content of our previous, very successful PMP Prep course.
- There are flow charts of where each process's inputs come from and where the outputs go. This understanding is necessary to pass the exam.
- The course follows the flow of project management, not the knowledge areas. The PMBOK is written by knowledge areas but the exam is structured by the flow.

What Does PMP Mean To You and Your Organization?

These economic times have been difficult for organizations and individuals. One thing that organizations have determined is that they need to do their work faster, less expensively and with higher quality while meeting the requirements of their customers.

Project management does just that and Project Management Professionals (PMP) are trained in the tools and techniques necessary to make projects and organizations more effective and efficient.

Here are a few things PMP can do for organizations:

- Your clients will have increased confidence because your project managers and team members are professionally trained in planning and managing their projects.
- Your workforce will be more disciplined.
- Your workforce will know what to look for before they start a project.
- You will have repeatable processes and improved project results.
- You will retain employees by investing in their professional development.
